

HIPAA Privacy and Breach Notification Assessment

Expert Consulting and Purpose-Built Software to Help Your
Organization Ensure Compliance

As a healthcare organization, you're responsible for ensuring compliance with all HIPAA Privacy and Breach Notifications Rules, including all standards, implementation specifications and audit protocols. Both of these rules apply to all protected health information (PHI), whether in electronic, paper or other formats.

The list of requirements can sometimes feel daunting and some healthcare organizations struggle to keep up.

Build a Partnership with Healthcare's Compliance Leader

Clearwater's HIPAA Privacy and Breach Notification Assessment (HPBNA) process can help your organization better manage and address all of these requirements. HPBNA protects your organization and your data with a complete and thorough gap analysis of your Privacy and Breach Notification Rules compliance.

Recognized as healthcare's Compliance and Risk Management leader the past five years in a row, Clearwater delivers a comprehensive, documented baseline assessment of your organization's compliance status with respect to all Privacy and Breach Notification Rules requirements. With the HPBNA process, you can ensure compliance and demonstrate to your stakeholders and customers your commitment to PHI protections.

Proven Methodology

Clearwater's proven methodology leverages your subscription to our industry-leading IRM|Privacy® SaaS tool, which efficiently and effectively evaluates all 60 standards, 63 implementation specifications, and 80 audit protocols to provide an actionable and systematic plan to achieve compliance with these rules.

Clearwater identifies your current gaps, equips your team to address those gaps and provides a repeatable, sustainable methodology and software to complete and document compliance evaluation each year. Your team can perform future assessments following the same methodology.

Key Benefits

- **Fully documented assessment data**, along with all related details populated in your subscription to IRM|Privacy® SaaS software, which you can further leverage for reporting and remediation workflow management
- **Training for your privacy and breach notification compliance team** on how to utilize the Clearwater IRM|Privacy® software to facilitate remediation tasks and perform future assessments of Privacy and Breach Notification rules compliance
- **A Privacy and Breach Notification Compliance Findings, Observations, and Recommendations (FOR) report, including:**
 - Initial "Quick and Easy" initiatives that result in a significant push forward in compliance and compliance awareness
 - Priority items that focus on OCR audit protocols with the greatest ROI
 - Detailed initiatives on additional work your organization should complete as part of your compliance journey
