

# HIPAA Security Assessment

Expert Consulting and Purpose-Built Software to Help Your Organization Ensure Compliance

As a healthcare organization, you are subject to the HIPAA mandate for a periodic evaluation of your HIPAA Security Final Rule compliance. This is something the Office for Civil Rights (OCR) may review during a HIPAA audit or in conjunction with an inquiry.

Unfortunately, many healthcare organizations struggle to meet compliance with all of the Rule's 22 standards and more than 50 implementation specifications.

But there is a way to overcome those challenges without hiring more employees or investing in a stack of disparate new technologies.

## Build a Partnership with Healthcare's Compliance Leader

Recognized as healthcare's Compliance and Risk Management leader the past five years in a row, Clearwater delivers a HIPAA Security Assessment (HSA) that streamlines your assessment process while taking a rigorous, systematic approach and fully documenting actions in our SaaS-based IRM|Security® tool.

The HSA combines our industry-leading IRM|Security® software solution with hands-on training and support from a team of seasoned experts to set you up for success. We help you follow the letter of the law, as well as OCR audit protocols, so you can feel confident in your approach to HIPAA security—now and in the future.

## Proven Methodology

Clearwater will help your organization satisfy the Security Rule's explicit requirements, identify your current gaps, equip your team to address those gaps and provide a repeatable, sustainable methodology and software to complete and document an evaluation of compliance each year. Your team can perform future assessments following the same methodology.

## Key Benefits

- **Education to help your staff maintain your compliance status** and to perform and document this evaluation yearly, as the HIPAA Security Rule mandates
- **Evaluation of your HIPAA Security Rule compliance**
- **Fully documented assessment data**, along with all related details populated in your IRM|Security® SaaS software subscription, which you can further leverage for reporting and remediation
- **Training for your privacy and breach notification compliance team** on how to utilize Clearwater IRM|Security® software to facilitate remediation tasks and perform future HIPAA Security Rule compliance assessments
